Name: Maria Gonzalez
Date of Birth: 04/22/1965
Insurance: BlueCross BlueShield, ID: BC-2847193
Address: 742 Evergreen Terrace, Stuttgart, 70174
Phone: +49-711-555-0842

REFERRING PHYSICIAN

Physician: Dr. Thomas Weber, MD
Department: Internal Medicine, Nextera Primary Care
Date of Referral: 2026-02-25

CHIEF COMPLAINT

Persistent chest pain and shortness of breath for 3 weeks. Patient reports episodes of substernal chest pain, worse with exertion, radiating to the left arm. Episodes last 5-10 minutes, relieved by rest. Denies syncope, palpitations, or peripheral edema.

CURRENT MEDICATIONS

Metoprolol 50mg	daily	(Beta-blocker)
Lisinopril 10mg	daily	(ACE inhibitor)
Aspirin 81mg	daily	(Antiplatelet)

ALLERGIES

Sulfa drugs (rash)
Penicillin (anaphylaxis -- SEVERE)

VITALS AT REFERRAL

Blood Pressure: 142/88 mmHg
Resting Heart Rate: 78 bpm
SpO2: 97% on room air
Temperature: 36.8 C
BMI: 28.4

DIAGNOSTICS

ECG at referring office showed nonspecific ST-T wave changes in leads V4-V6. Chest X-ray: mild cardiomegaly, no infiltrates.

FAMILY HISTORY

Father: Myocardial infarction at age 58 (deceased)
Mother: Hypertension, Type 2 Diabetes
Sister: No cardiac history

ASSESSMENT & REQUESTED EVALUATION

61-year-old female with exertional chest pain, hypertension, and family history of premature coronary artery disease. ECG changes warrant further evaluation. Requesting stress echocardiography and cardiology consultation.
